

# ANSWER

S T O V E

Shown with sharp redwood paint and optional pedestal

It may be small, but the compact Answer's size belies its incredible heating capacity. The Answer uses a five-sided convection chamber to distribute heat evenly throughout your home. Cool room air is naturally drawn around the hot firebox, heated, and returned back into the room without using a blower. The Answer's 1.6 cubic foot firebox is larger than most other small stoves, so it offers longer burn times with less reloading. It's a powerful heater for its size, yet backwall clearance is just 200 mm to a combustibile surface. The Answer is also approved for mobile home installation (ask your dealer for details).

Options: Doors, Legs, Pedestal, Convection Fan & Etched Glass

Emissions	Heating Capacity	Heat Output	Maximum Burn Time	Firebox Size	Maximum Log Size	Weight	Construction	Efficiency
3.2 g/Kg Per Hour	180 Sq. M.	66,800 BTUs/Hr.	8 Hours	.05 Cubic Meters	457 mm	136 Kg	9.5 to 6 mm Steel Plate	61.7%
