

DVL GS Cypress

Direct Vent Gas Insert

with GreenSmart™ Technology

The Lopi DVL GS Cypress Gas Insert is designed to transform your old inefficient masonry fireplace and turn it into an efficient source of heat for your home. With the combination of convective heat, radiant heat and reduced depth dimensions it is ideal for existing fireplace openings.

The realistic Ember-Fyre™ “wood like” flame, along with the heat output can be controlled by the convenient GreenSmart remote system. The GreenSmart Comfort Control™ feature allows you to turn off part of the burner with the push of the button to really turn down the heat while maintaining the fire and glowing embers. This allows you to comfortably be able to use your fireplace all year round.

Lopi DVL GS Features

- GreenSmart™ burner system

- Heating up to 185sqm*

FEATURING

*Heating capacity varies according to floor plan, insulation & outside temperature

DVL Cypress Options & Dimensions

This latest face design not only provides a contemporary look but also has the inclusion of extra accent lights either side of the face itself as well as within the firebox to create a beautiful piece of furniture, not just a fireplace, that can be enjoyed all year round.

Each DVL Cypress fireplace comes standard with the standard GreenSmart Remote Control.

Optional Fireback Liners

Fireback liners enhance the look of your fire. The two different brick options offer a realistic look to your fire casting shadows when used in conjunction with the standard accent lights. The black enamel is highly reflective meaning the appearance of even more flame and stunning reflections.

Enamel Black

Straight Brick

Herringbone Brick
